

Projet: _____ **Type:** _____

Area Light - Microwave Motion Sensor

Microwave Motion Sensor is specifically designed for Area Light V3 fixtures. It detects the presence of people or vehicles within the lighting area and automatically adjusts the brightness accordingly. This helps reduce energy costs while ensuring adequate lighting only when needed. Easy to install and configure with the SpecLite universal remote, this sensor offers reliable performance and adaptability to various usage conditions.

CHARACTERISTICS

- Motion Detection: Automatically adjusts brightness based on the presence of people or vehicles.
- Energy Savings: Reduces costs by illuminating only when needed.
- Easy Installation: It screws onto the fixture base and can be easily configured with the SpecLite universal controller.
- Microwave Technology: Reliable performance for high applications without metal obstructions.
