

# LED Circular Highbay

<b>SSL-CHB2</b>	<b>Segment</b>	<b>Wattage Range</b>	<b>Lumen Range</b>
	Industrial & Commercial	Selectable Wattage (90W-240W)	13,800-37,000lm

## Features

- Pressure Diecast Aluminum Housing with Driver enclosure for better Thermal Management.
- NEMA 4X & NSF Certified, IP65 rated with operating temperature range of -20° C ~ +50° C.
- Field Selectable CCT (4000K & 5000K) & Wattage (90W - 150W in 150M & 180W – 240W in 240L model) along with 120-347 V Auto Sensing Driver.
- Superior efficacy of  $\geq 150$  lm / W, Impact Resistant premium grade PC Lens designed for even light distribution.
- 10' White Power cord

## Specifications

### Housing:

Aluminum alloy pressure die casted housing & control gear box for better heat dissipation.

### Optics:

Impact & UV Resistant PC Lens, for even and glare free distribution.

### Mounting:

Hook (supplied), U bracket (for pendant or adjustable mounting), Linkable mounting bracket.

### Driver:

120-347 V Auto Sensing Driver options with Operating temperature range of -20° C ~ +50° C.

### LED:

Field Selectable CCT of 4000K & 5000K. Efficacy of  $\geq 150$ lm/w.

### Controls:

Compatible with 0-10V Dimming and Bi-level Microwave sensor.

### NOTE:

- Microwave can penetrate walls or glass thinner than 20cm, movement in adjacent corridors may be detected.
- Detection area will be affected by speed of motion, mounting height and movement volume.
- Installation shall not be mounted to avoid false trigger caused by the luminaire itself shaking. (Rooftop HVAC, upper floor vibration, etc.)
- Shall not be installed next to large operating machines such as ventilator/ceiling fan to avoid false triggering caused by machine vibration.
- They cannot penetrate metal. Large metal object near the sensor may create a "dead zone" behind it.
- Microwave sensors have advantage over PIR device in that they can operate in hot environments, however, they are sensitive devices and can be prone to false detection by everyday items like ceiling fans, moving branches or curtains, loose packaging, etc.

Other options may be available, consult Turolight Sales. Specifications and data are subject to change without notice.  
**Microwave sensors should be tested before, if used in close proximity to Airports / Communication towers etc.**
